

IMPROVEMENT SOCIETY HELD ANNUAL MEETING

**Heard Able Address by Prof. Pickett
and Elected Officers--Reports of
Secretary and Treasurer.**

The annual meeting of the Portsmouth Improvement Association was held on Thursday evening, at Association hall with a small but representative attendance. President George A. Wood presided and in his brief annual address called attention to the work that the society had accomplished. He recalled that at his first annual address he called attention to the unsightly condition of the land about the South pond, and considered that the society was entitled to the credit for having the improvements stated which now promises to make that section a credit to the city. He considered that the Association by example brought about better results than by any specific acts, for the association was awakening the citizens to the fact that it was for their benefit that everything should be kept clean and orderly about the city.

Report of the Secretary.

Rev. Alfred Gooding, the secretary, said in his annual report: "During the past year the association has done more work and spent more money than in any other year since its organization. Soon after the annual meeting we purchased ten galvanized iron rubbish tubs and had them painted and lettered, to take the place of the worn out wooden tubs which has served an excellent purpose for many years. Believing that the work of city scavenger could contribute materially to the neatness of the streets we employed a man in uniform and carried a rubbish bag marked with the name of the association.

The quantity of floating paper and other waste which he picked up in the course of these two months was most extraordinary, and I venture to say that his labors had a great deal to do with the respectable appearance of our streets during the summer season. This effort in the cause of public cleanliness cost the association about \$100. More than \$250 was spent upon turf, loam, shrubs, trees, tree guards and labor with these materials.

An extensive and costly piece of work was done re-turfing along stretches of the grass borders on State street, which had become entirely bare of grass. These narrow borders on State and Middle street are most difficult to maintain. Children walk upon them by preference after crossing the street. Many people instead of using the crossings provided and maintained for their convenience reach the sidewalks by tramping diagonally across the grass border. In my opinion it is only at the cost of constant care that this narrow strip of green can be kept in proper order. The association would be glad to have its membership increased and invites all interested citizens who are not now members to become so.

The Report of the Treasurer.

The report of the treasurer, William C. Walton, was as follows: Portsmouth Improvement Association.

KITTERY LETTER

Academy's Program for Graduation

Mumps Are Prevalent at Kittery Point

Miss Ethel Mitchell Is to Graduate at Wellesley

Navy Yard Man Moves His Family into Kittery Village

Kittery, Me., June 10.

Kittery correspondent's telephone 295-5.

The program is as follows for the Traip Academy graduation, to be held Friday afternoon, June 24, at 2:30:

Orchestra selection, Whitman's orchestra.
Prayer.

Orchestra selection.
Salutatory, The Development of Electricity in its Practical Uses, Ernest Charles Baker.

Essay, Customs in Many Lands, Bernice Emma Gilden.
Class History, Herbert Emery Tobey.

Orchestra selection.
Class Prophecy, Orman Remick Paul.

Essay, Aftermath, Evelyn Emily Raynes.
Valedictory, eulogy upon Abraham Lincoln, Leon Paul Spinney.

Orchestra selection.
Presentation diplomas, President Calvin E. Hayes.

Presentation of class gift, Alice Coes.
Presentation of medals, Supt. Elmer E. Burnham.

Orchestra selection.
The graduating class members are Alice Coes, president; Orman R. Paul vice president; Bertha E. Seaward, secretary; Leon P. Spinney, treasurer; Ernest C. Baker, Ruth M. Baker, Marion Cutts, Francella A. Emery, Berenice E. Gilden, Eva A. Lambert, Louise M. Lewis, Evelyn Emily Raynes, Herbert E. Tobey, Florence G. Webber.

The Christian Endeavor will have as their guest tonight at the strawberry festival, a former pastor, Rev. J. R. Laird. Mr. Laird is located at Camden, Me. He came here on Thursday to attend the funeral of Mrs. Octavia Remick.

Rev. Fred C. Norcross will be one of the speakers at the meeting of the Methodist ministers of the western division of Portland district, to be held at South Berwick on Monday, June 20. He will give an address on "The Adult Bible Class."

Mr. Fred Bradbury of Dover, N. H. has opened his summer home on Ferry Lane for the season.

The following letters are advertised in the Kittery postoffice for period ending June 11, Mrs. Thomas Grant, Mr. Henry Norton, Mr. Cushman Phil-

TUNGSTEN LAMPS

(The trade name recently given to the Tungsten Lamp is Mazda Lamp, but means nothing except a trade name.)

Reduction in Price

Customers entitled to free renewals of carbon incandescent lamps can now obtain Tungsten Lamps in exchange, for the following excess prices:

25 Watt	\$.50
40 "50
60 "70
100 "75
150 "	1.00
250 "	1.50

lips, Mrs. E. Richardson. Period ending June 13, Miss May Bartlett, Mr. Clarence P. Brothor, Mr. Alfred E. Drew.

The senior class wishes to remind the public again that they are cordially invited to attend their baccalaureate sermon to be preached in Academy hall, Sunday afternoon, June 13.

Mr. Small of the navy yard has just moved his family into Mrs. Hattie Wentworth's house on Wentworth street.

Kittery Point

Kittery Point correspondent's telephone 295-5.

Owing to an error in Thursday evening's paper it was stated that the firemen's dance was held Wednesday evening instead of Thursday evening. However, the attendance was good and a good time was enjoyed by all.

Mrs. Thurston D. Patch was a guest in Portsmouth yesterday.

Mrs. George B. Fernald entertained the Sewing Circle of the First Christian church Thursday afternoon.

Mrs. Curtis Chick is the guest of her parents, Mr. and Mrs. J. Sawyer.

Mrs. Justin Sawyer makes the third victim of the mumps in this vicinity. Rehearsals are going on for the cantata "Voices of Nature," under the direction of Mr. J. W. S. Hodgdon. After the performance, candy will be on sale, the booths being in charge of the pupils of the Mitchell grammar school.

Mr. Samuel Blake, who has been very ill, is slowly improving and sitting up again.

Miss Lottie Brooks is out of doors again after a long illness.

Mr. Sidney Frisbee is at home on a vacation from his duties in Boston, for a few days.

A number in town have received commencement exercises invitations from Miss Ethel Mitchell, who graduates from Wellesley college this June. Commencement lasts from June 17 to June 21.

EVENTS OF ELIOT

The High School Graduates a Class of Eight

Latest Items About the Visitors in the Town

Eliot, Me., June 10.

A class of eight was graduated from the Eliot High school on Thursday evening at the Congregational church. The program was:

The church was beautifully decorated with plants and flowers. Good music was furnished by a quintet from the Portsmouth Orchestral club—Chauncey B. Hoyt, violin; Ira M. St. Clair, clarinet; William J. Kershaw, violin cello; Edwin G. Cary, cornet; Ralph S. Parker, piano.

The class was marshalled by Howard B. Nelson of the class of 1912. The class gift to the school was three handsome large engravings of

TROUBLE GALORE ON DANIEL ST.

Sailors Nearly Wreck Laundry with Flatirons and Sewer Caps

Also Colored Dancers Settled Their Difficulties by a Lively Street Fight

If anybody wanted excitement they would have been supplied with plenty on Thursday night at the corner of Daniel and Penhallow streets.

Today after a glance at the front of Charlie Wong's laundry, one would think the dynamite cruiser Vesuvius had been at work on the place.

Shortly after 11 o'clock, as the working force of Wong's shop were hitting the pipe a couple of sailors came in and, following some argument there was a busy scene.

The floor manager ordered them out and followed them to the door, armed with a flat iron.

In the time the iron was sailing after the jackies in the street, and it hardly landed when one of the blue-jackets walked it back through the windows.

Another iron came along, and back it went the same way.

While this flatiron movement was on, the other sailor was looking for more ammunition and tried to tear up the bricks of the sidewalk and piece of the asphalt. The only thing he could find was the caps of the sewer traps, weighing twenty pounds or more, which he picked up and hurled through the screen door and window, and they then made their escape. It's a sure thing that a good part of Charlie's earnings will go to repair work today.

While Uncle Sam and the Celestials were at war, a four round bout was on just around the corner.

Two colored men, who started to clash in a dance hall nearby, over the affinity walk, adjourned to the street where the fight ended by one putting the other out with a blow under the jaw. Altogether it was a busy evening in that locality, which has of late got a little on the red light district.

rheumatism is now nursing a very severe cold.

Mr. Harry Soarles is at Rosemary cottage, putting ceilings and wood-work in first class order for the summer.

Mrs. Charles Pinkham of Harpell is the guest of her parents, Rev. and Mrs. W. B. Eldridge.

The East Eliot Methodist parsonage is undergoing a thorough painting and papering down stairs, a much needed work.

DOVER LODGE INVITED

To Work the First Degree in This City for Osgood Lodge.

Osgood Lodge, No. 48, I. O. O. F., have extended an invitation to Mount Pleasant Lodge, No. 16 of Dover, to work the first degree, Thursday evening, June 23. The Dover degree staff have accepted the invitation and will bring down a large delegation to witness the work.

At the meeting of Osgood Lodge, last evening, five applications for membership were acted upon.

Spring lamb and asparagus at Cater and Benfield's.

THE WEATHER

Friday night and Saturday—Unsettled weather with showers.

Wm. G. WALTON,

Treasurer.

Prof. B. S. Pickett of the New Hampshire College, delivered a very able and interesting address on "The Care and Preservation of Shade Trees," and he said:

The Care and Preservation of Shade Trees.

The towns and villages of New England have been characterized for the beauty and dignity of their shade trees. In no other part of America can be found the same charm as is connected with the trees in this region of the United States. Age alone can give the noble stature that lends the qualities of dignity, beauty and grace to the elm. Age alone can give to the oak its character of strength and ruggedness. In picturesque quality, in nobleness, in grandeur and in beauty, the shade trees of New England, derives from their greater age an advantage that few of the towns in the more Western states possess. The time has now come, however, when many of these grand old specimens are decaying and one frequently hears of some splendid tree that may have been old a century ago, dying out and leaving behind it but the memory of its stately self. In New England her traditions of the past are dear to every native son and daughter, the death of these splendid trees is marked with the deepest regret. So deep is the interest displayed in this matter, that there are many people who would spend very large sums of money in the preservation of their shade trees, if they could but be assured that these monarchs of the forest could be retained in health and vigor.

Studies of the shade trees lead to some very interesting conclusions regarding the ages to which they may live and the causes which effect their decadence. The accidents of storm, the attacks of the insects and fungus diseases, the struggle for existence among the trees themselves, the carelessness, greed or wantonness of men are all to a large extent responsible for injuries to our shade trees. Old age, too, claims its share of our tree life, as well as of animal life, but old age is much less frequently a

cause for decadence in shade trees than is generally supposed. The condition prevails in many towns where the shade trees are dying at the age of fifty or sixty years, while within a short distance from them, other trees of the same species are vigorous and fresh at thrice their age. There must be specific causes for these differences in the behavior of trees, and since man no longer accepts the incidents of time and place as mere accidents, but refers them to causes which may be analyzed, the death of our shade trees is no longer accepted as a ruling of Divine Providence, which cannot be controlled, or in some way prevented by the intelligent agency of man.

Some months ago, the writer made a careful examination of the shade trees in one of the larger New Hampshire towns, and tabulated the causes of injury to some 400 trees. Many of these trees were very old. Some were probably 150 years. A few may have reached the venerable age of 200 years, and yet among these 400 trees marked as needing treatment of one kind or another, only six were diagnosed as deteriorating through the effects of old age. Specific causes could be assigned for the injuries to all the other trees examined and nearly all of these were directly traceable to the ignorance or carelessness of men.

The commonest cause of injury found in the examination of the shade trees alluded to in the preceding paragraphs resulted from too close planting and over crowding of the trees. Close pruning brings with it a long train of troubles for shade trees. Every tree robs or weakens its neighbor and none attain their full possibilities in beauty or development. In the dense shade caused by too thick planting, fungus diseases find their best opportunity for development, and insects find secure hiding places, in which to breed and do their work of mischief. The branches of trees, where densely shaded, grow long and weak and are in constant danger of being blown from the trees in high winds, menacing the safety of the travelers, who pass beneath them. Ninety-seven trees among the 400 which were examined owed their troubles directly to over-crowding and very many were predisposed to disease or insect attack as a result of too close planting.

Next in importance to over-crowding as a cause of injury to shade trees was starvation of trees. While but a few trees were actually dying of this cause, the great majority of those which were examined were suffering from lack of fertility in the soil in which they were growing. It is certain too that very many of the trees which were not included in the 400 that needed treatment would have been benefited by the addition of plant food to the soil. The shade trees in the cities and villages grow almost entirely upon parkings, the sides of boulevards and on private grounds or lawns. The grass under these trees is kept closely and carefully mown and in many instances is raked when cut. The lawns are ordinarily rolled hard and firm in the spring. There is, therefore, a constant reduction in the fertility of the soil. The grass divides the plant food with the trees and the conditions are ideal for the rapid evaporation of moisture from the soil, and the trees meet with ex-

ceedingly unfavorable growth conditions.

The remedy for tree starvation is of course the addition of plant food. The ideal fertilizer for shade trees is well rotted stable manure, applied as a top dressing about the trees just before the first snow is expected in the fall or early winter. As stable manure, is however, more or less objectionable, in cities and villages, it is frequently necessary to use some form of concentrated chemical or commercial fertilizer. Where trees have been neglected for considerable periods of years or perhaps have never received any kind of fertilizer, the following formula is recommended. Trees having a spread of branches of forty feet or trunks eighteen inches in diameter:

Sulphate of Potash, 25 to 30 lbs.
Bone meal, 30 lbs.
Dried Blood, 40 lbs.

(Or cotton seed meal), 60 lbs.
Increase or decrease these quantities to the size of the tree. For annual dressings after this first application has been made, reduce the quantity above recommended by one-half.

Injuries caused by mistake in pruning, rank third in importance. Among the causes of deterioration in the shade trees examined, the usual mistake is that of cutting off branches and leaving stubs three inches or more in length to project from the trees. Of the same character were the injuries resulting from branches broken by the wind or other accidental causes. Long stubs of exposed wood admitted the entrance of wounds and wood rot fungi. Decay would then ensue in these branches and extend in to the heart of the tree, utterly destroying its life.

The rapid deterioration of trees is more frequently caused by fungi which set up rot in the trunk or branches of the tree. Yet this form of injury is one that is very readily prevented in cutting branches. The branches should always be cut back to the parent branch or trunk. No stubs whatever should be left, if the branch be more than one inch in diameter. The wound left should be painted with a good white lead paint to keep out moisture and prevent the entrance of wood rot fungi. When large branches are torn from the trees by wind or other accidental means or when wounds have been inflicted in any way, the exposed parts should be trimmed back to fresh clean wood, the wood should be washed with an antiseptic such as corrosive sublimate or copper sulphate, and then be painted. Care in forming the head of the tree during the three or four years following planting will eliminate much of the necessity for pruning in later years, and small wounds made at this time heal more rapidly than large wounds made later in the life of a tree.

Insects are another cause of injury to our shade trees. In many cases insects' attacks follow more or less as a consequence of poor growth conditions in the trees themselves. The maple borer, the most pernicious insect enemy of the maple in New England seldom or almost never attacks vigorous, healthy maple trees. The larva is too weak to penetrate the growing tissues of the stronger trees. It is overgrown in its bore, and never succeeds in obtaining an entrance. On the other hand weakly maples are subject to the attacks of these insects and as soon as the tree has commenced to deteriorate through lack of fertility or the entrance of fungi, as a result of bad pruning, it becomes susceptible to the attack of the borers. The same condition holds true for many other kinds of insects, particularly those belonging to the plant lice classes. There are certain other insect enemies, however, which are not to any great extent checked in their depredation by healthy vigorous growth of the trees on which they prey. Among these are the well-known brown-tail moth, the Gipsy moth, the Tent Caterpillar, the Fall Web Worm and the Tussock Moth.

It requires much ingenuity to deal with the problem of insects on our shade trees. Borers can to some extent be gotten rid of by means of soapy washes, applied during the periods when the adults are laying their eggs in the trees. In some cases, as in the Gipsy moth and tent caterpillar the egg nests can be destroyed or removed during the winter season. Until the brown-tail moth assumed such serious proportions as it now assumes, the practice of removing the nests in the winter time and destroying them is sufficient to hold the insects in check and prevents their doing damage on those trees upon which the nests were removed. This practice is still efficient so far as the destruction of the moths is concerned, but the damage done to the trees in the process of pruning and in the process of cutting out the nests and checking about the trees in many cases more severe than the injury caused by the moths and a better rem-

edy for this must be devised immediately.

The most efficient single means of controlling the insect pests within restricted areas is that of spraying with poisonous or suffocating sprays. The larger towns and cities are spending considerable money each year in purchasing powerful spraying outfits that will enable the park commissioners, who have charge of the shade trees to control insect attacks. In the scope of this article it is impossible to give directions for the spraying of shade trees. Every insect is a law unto itself and the character of spray which is to be used and the time of its application will depend altogether upon the character and life history of the insect which is to be combated. It may be stated, however, that among the insects which must in many places now be controlled by spraying, are the Elm Leaf Beetle, the Brown-Tail Moth and in some instances the Gipsy Moth, Plant Lice, the Saw-fly and occasionally the San Jose Scale.

Another common form of injury to shade trees and one which is almost entirely preventable is that caused by telegraph, telephone and electric power line companies. In the erection of poles and wires these companies have caused untold damage by slashing out branches from trees and generally mutilating them, or attaching guy wires to road-side or street trees. Either the poles should be carried high enough to pass completely over the trees or else should be made to go around those which stand in the road. In the towns all wires should be carried in conduits underneath the streets.

Gas poisoning causes the death of many trees in towns and cities. Gas poisoning is nearly always caused as the result of cheap work in the laying of gas mains and the attaching of branches. Most of the damage done by gas is caused during the winter. The surface of the ground freezes over and all the gas which accumulates from leaks in the pipes is retained in the soil and gradually kills the roots of the trees. Very small gas leaks probably do little or no damage during the growing season, but large leaks will frequently kill trees within a few hours. A tree badly affected by gas poisoning may generally be considered beyond redemption. Where a tree died suddenly without apparent cause, gas poisoning should be suspected and leaks in the pipes immediately searched for and stopped in order to prevent similar damage to other trees. Where the trees are merely sickly and gas poisoning is suspected, the leaks should be looked at and stopped. The ground under the trees should be dug up and an application of some quick acting fertilizer should be applied to stimulate the growth of the tree. Instances are on record where the owners of trees have received damages from the gas companies for trees destroyed as a result of leakage of gas. Many other causes of injury to shade trees might be mentioned, such as the careless attachment of brace wires and guy wires in electric work. The gnawing of horses and the tying of horses to trees along the streets. The scraping of hubs of wagons in turning corners or in driving close to trees planted beside the street. Suitable remedies or preventatives should be adopted in each of these cases to prevent injury by these means. The ingenuity of the individual owners of the trees will often have to be exercised to accomplish this.

Tree surgery is a term that has come into vogue within the last few years and is used to designate that part of the work of the expert who makes it a business to cure for and in many cases as it were doctor diseased trees. Tree surgery in the people's mind has very commonly been accounted a sort of mechanical process has been regarded as a profession upon only to geniuses who may have been born with special endowments in that direction. Tree surgery is, however, in principle an entirely simple process. It consists solely and essentially in the removal of dead or rotting wood from trees. The sterilization of the tissues exposed in the process of removing the dead wood and the filling of resultant cavities with concrete on the part of resulting wounds with antiseptic dressing of some sort or another. This process varied more or less in detail is essentially tree surgery. The one thing about it that must be observed in order to meet with uniform and certain success is thoroughness. Every particle of diseased wood must be removed from the cavities or portions of the tree which are undergoing treatment. The cement or concrete work must be very thoroughly and carefully done. In large cavities, frame works of iron to hold the cement in place and prevent cracking and expansion under varying conditions of temperature are often necessary. The surface of concrete fillings must be made perfectly smooth and water tight. If any portion of

the wood is left within the trunk of the tree, the rot will simply continue underneath the covering of concrete and cause as much damage ultimately as though the wound had not been treated.

The "Tree Doctor" is a recent addition to the ranks of the professional men. Tree doctoring consists essentially in applying of the principles that go with the care of trees and includes the fertilizing, cultivating, spraying, pruning and finally the operations of tree surgery. In the care and preservation of shade trees the true "Tree Doctor" will be an ever more important figure. It behooves those, however, who are seeking the service of such men to assure themselves that those who pose as experts in these matters be really qualified men. Tree growth involves the deepest principles in physiology and morphology of plant life, and nothing less than the most thorough acquaintance with the latest scientific information on these subjects together with a knowledge of soils and fertilizers will enable a "Tree Doctor" to accomplish the best results for his patrons.

Election of Officers

A nomination committee consisting of Messrs. Charles A. Hazlett, Joseph Foster, Mrs. Alfred Gooding and Miss Frances Mathes were appointed by the president and they brought in the following list of officers, who were elected:

President, George A. Wood.
Vice Presidents, Wallace Hackett, Mrs. W. A. Hall.
Secretary, Rev. Alfred Gooding.
Treasurer, William C. Walton.
Executive committee—Charles A. Hazlett, Horace P. Montgomery, F. D. Lewis, George W. McCarthy, Rev. L. H. Thayer, Mr. J. A. MacDougall, Mrs. J. W. Parsons, Mrs. C. W. Brewster, Mrs. W. D. Walker, Miss Mary E. Call, Miss Frances A. Mathes, Miss Emily Bracelin.

ELECTRIC SIGNS

The stores that stand out and put their competitors in the shade are electrically lighted, and most of them have good, bright, telling electric signs over the door.

An electric sign is the sign of the business man—the man who is always just near enough to the front of the procession to be known as a business leader in the community.

RAILROADS NOT BACKING DOWN

Intend to Insist on Recognition of Higher Rates

CONSIDERED JUSTIFIABLE

Will Support Them Formally Before Commerce Commission When New Law Becomes Effective—Passenger Rates Not Dealt With in Agreement With Taft, Railroads Being Entirely Within Their Rights in That Respect

Washington, June 10.—The eastern railroads, including the New York central, Erie, Delaware and Lackawanna, have decided not to withdraw the increased rates which were recently filed with the interstate commerce commission and which were the subject of a White House conference on Tuesday. Instead, they will submit supplemental notices, postponing the date of the enforcement of these higher tariffs until after the railroad bill shall have become a law.

Arrangements to the foregoing effect were made at the commission, when representatives of the eastern roads conferred with the commissioners regarding the best way of carrying out the White House agreement. This means that the railroads have not backed down in their contention that the increases are justifiable. Also, that they intend to insist on the recognition of the higher rates, and that they will support them formally before the commission after the new law becomes effective.

Whether or not the increases are to stand will be determined on full hearing by the commissioners.

Increases in communication passenger fares made recently by the railway lines operating out of New York city will not be affected by the verbal agreement reached by the railway officials and President Taft. This announcement was made at the offices of the interstate commerce commission. In the judgment of the officers of the commission, the rates discussed by the president and the railroad officials were freight rates. These are the only rates that generally have been increased.

Advances have been made in the communication rates out of New York city by all of the lines doing a communication business. They will become effective on or about July 1. In some instances the increases amount to 33 percent, or even more, but generally the advances aggregate between 5 and 10 percent.

It is held, however, that the commission is bound to recognize the tariffs making the increases, so they were filed in the regular way provided by the statute, the railroads being entirely within their rights in making the increases. Whether the interstate communication rates fixed by the new tariff are reasonable or not is a question for future determination.

Of course the volume of communication traffic must be considered in the making of such a rule, and also in the determination of its reasonableness. Sooner or later it is expected that the interstate communication rates made by the New York lines will come before the interstate commerce commission, but they apparently were not covered by the agreement entered into regarding "rates" by the railroad officials and President Taft.

STRUCK BY AN ENGINE

Four Occupants of Funeral Coach Killed and One Dying

Haverstraw, N. Y., June 10.—Three mourners, their pastor and their driver, sat in a funeral coach here and watched certain death come rushing down on them at fifty miles an hour.

With a screech of grinding brakes, a heavy freight engine, hurrying south to pick up a train at Weehawken, dashed into the coach, scattering its occupants along the right of way.

All the occupants were either killed outright or fatally injured. The dead are Rev. A. Romath, E. V. Seifred, Mrs. E. V. Seifred and William Beebe.

Mrs. Perry Kessler's skull was fractured and she will die.

A NAVY FOR CANADA

Bids For Construction of Warships Will Be Asked For in September

Ottawa, June 10.—The Dominion cabinet has appointed G. H. Desbarres, deputy minister of marine and fisheries, as deputy minister in charge of Canada's new naval service department and Alex. Johnson as deputy minister of marine and fisheries to succeed Desbarres.

Tenders for war vessels to be built in Canada will be called soon, probably in September, and the British method will be followed as closely as possible.

Killed by Live Wire

Hartford, June 10.—While standing at the top of a ladder, trimming dead branches from a tree in front of his home, James F. Dillon, aged 21, was electrocuted when the pruning shears he was using came in contact with a live electric light wire.

PRINCE FUSHIMI.

Mikado's Cousin, Who is Touring United States.

Photo by American Press Association.

ON TRIP AROUND GLOBE

Prince Fushimi and His Wife to Visit Boston For Few Days

Boston, June 10.—Prince and Princess Fushimi of Japan, the first members of the royal family to visit Boston, will arrive here on Sunday.

They are to "do" Boston for a few days, visiting the Fore River shipyards and the various places of historic interest and museums about the city. They are at present in New York. From here they go to Niagara Falls, Washington and the west. The return to Japan will be made from San Francisco, June 21. This will complete their journey around the world.

The prince is the cousin of the mikado and was his special envoy at King Edward's funeral.

MILK CONTRACTORS FINED \$50 EACH

Charged With Having Milk of Too High Bacterial Count

Boston, June 10.—Two milk contractors were found guilty by Judge Wentworth of the municipal court of the charge of having in their possession milk which contained more than half a million bacteria. George Whiting, who was the first defendant to be called, pleaded not guilty and was fined \$50. Inspector Jordan, who appeared for the board of health, stated that a sample of milk was found to contain, he claimed, 1,600,000 bacteria per cubic centimetre. The defendant did not offer any defense, but appealed the case.

In the case against H. P. Hood & Sons, Inc., Charles W. Bond appeared for the corporation and pleaded not guilty. Jordan said that a sample which was taken from one of the Hood company's wagons contained 2,500,000 bacteria per cubic centimetre. The defendant was found guilty and fined \$50. He appealed.

TRAPPED IN COG WHEELS

Woman Owes Her Life to Foreman's Presence of Mind

Gloucester, Mass., June 10.—Annie Paige, aged 26, narrowly escaped death last night by being drawn into the mechanism of a moving carrier belt at the fish loft of Sylvanus Smith & Co., where she is employed.

Her right leg, which was caught in the machinery of the belt used to carry fish from one floor to the one above, was crushed from the ankle to the hip.

The woman was engaged in pillos handles of fish on the lower platform of the carrier belt. In some way either her skirt caught or she took a misstep and jammed her foot into the cog wheels. The right foot was engaged in the cog wheels, which drew in the leg, and would have ground her to death but for the stopping of the machinery.

The foreman of the floor happened to be standing by the lever that controls all of the machinery. Without waiting to find out the cause of the screams he shut down, just in time to save Miss Paige.

Taft Administration Endorsed Milwaukee, June 10.—The administration of President Taft is strongly endorsed in the platform adopted at the closing session of the Republican state convention. The present tariff law is approved and the provisions for maximum schedules and future scientific revisions are commended.

Homestead Bill Shelved

Boston, June 10.—The homestead bill, which provides that the state shall expend \$100,000 for the purchase of land for homes for workingmen in the manufacturing cities of the commonwealth, was referred to the next general court in the senate by a vote of 19 to 12.

ROOSEVELT IS SAILING HOME

Embarked on Steamer at Southampton Today

MOST NOTEWORTHY VISIT

Former President Achieved Great Popularity Among Every Class in England—Last Day Occupied in Long Tramp Through New Forest in Response to Challenge—Deprives Londoners of Giving a Sendoff

London, June 10.—Theodore Roosevelt's brief visit to England ended this morning, when he sailed from Southampton for New York.

Though unfortunately coinciding with the period of national mourning, and for that reason shorn of much of the splendor which would have accompanied it under happier circumstances, it was nevertheless one of the most noteworthy foreign visits paid to Great Britain's shores in recent years.

No foreign ruler or man of eminence could have aroused more universal attention, received a warmer welcome or achieved a greater popularity among every class of society.

It is true that his strictures on Egyptian affairs occasioned political resentment in some quarters, but he left no rancor behind, because he was regarded as a privileged guest in whom no unworthy or unfriendly motive could be suspected, and the frankness of his utterances is taken as a measure of the strength of the friendship binding the two nations.

The death of King Edward compelled the curtailment of public demonstrations and entertainments projected in his honor. Even at that, he was unable to accept half the invitations showered upon him. In characteristic fashion Roosevelt deprived Londoners of the opportunity of giving him a sendoff. Before the people were aware of his intention he had quietly left the city, not half a dozen persons knowing the time or the manner of his departure.

It appears that Roosevelt complained that he had not had time to see a hundredth part of the country. He particularly wanted to walk through a typical English country-side. Accordingly Sir Edward Grey, the foreign secretary, gave him a friendly challenge to tramp through New Forest, a picturesque and romantic spot, near Southampton, of geological and antiquarian interest. Roosevelt accepted the challenge.

Sir Edward is a keen angler and deeply interested in ornithology, and the two started yesterday on a tramp through the woods. They spent the night at an inn, motoring in Southampton this morning, when Roosevelt met his wife and family who went from London to Southampton in a special car.

The party occupied the evening on the special train, which was taken to the docks, where a special chartered by the line conveyed it to the Kaiserin Augusta Victoria, anchored in the Solent.

The ex-president had to decline an invitation of the mayor of Southampton to a public luncheon in his honor. He also expressed regret at his inability to lay the cornerstone of the memorial to be erected on the spot where the Pilgrim fathers sailed to America.

IS BEING WELL TREATED

Interests of Pittman Are Safeguarded by Americans in Nicaragua

Washington, June 10.—William P. Pittman, the Cambridge, Mass., engineer, who was captured some days ago by the Madrazo forces in Nicaragua while operating mines under the direction of Estrada, is reported a well, and being treated with consideration.

Consul Moffat, in a telegram to the state department from Bluefields, says that he himself is paying particular attention to Pittman and the officers from the United States warships in the harbor visit Pittman every few days at the bluff. They are of the opinion that there is nothing to complain of in his treatment.

DEATH OF DICKINSON

Casualty Company Says It Was Not Due to Natural Causes

New York, June 10.—C. C. Dickinson, the millionaire head of the Carnegie Trust company, whose death came soon after a recent visit to a laboratory in Scranton, Pa., to witness the artificial manufacture of silver, did not die from natural causes, according to a statement issued by the Casualty Company of America over the statement of President DeLoon.

Physicians employed by the company performed an autopsy. The company does not state what caused death.

Suicide on Wife's Grave

Leominster, Mass., June 10.—After spending the night in Evergreen cemetery, where ten years ago to the day his wife had been buried, Charles J. Wallin, 45, committed suicide by shooting in the head on her grave.

SOLONS WILL PROBE SCHOOLBOY SUICIDE

Order Calling For Investigation Is Adopted by Legislature

Boston, June 10.—The suicide of John Newman, the 14-year-old Cambridge boy who hanged himself at the Lyman school, is to be officially investigated by the Massachusetts house of representatives. This action was decided upon by the house when the order calling for investigation of the events leading up to the lad's death was adopted by a rising vote of 65 to 48.

For an hour and a half debate waxed hot on the measure under discussion. Certain members contending that the lad had been given a brutal beating at the institution, while others went to the defense of the school, its trustees and officials.

Representative Reed of Cambridge asserted that he had viewed the body of the youth, and that appearance indicated that he had been shamefully abused.

THREE MORE TURNED DOWN

Hub Mayor's Appointments Not Satisfactory to the Commission

Boston, June 10.—Three more of Mayor Fitzgerald's appointments were added to the civil service commission's "rejected list" yesterday, when the "time limit" expired on the appointments of Matthew Cummings, national president of the A. O. H., as superintendent of public buildings; Joseph P. Lyons, as penal commissioner, and Morris L. Morrison as a member of the board of assessors.

The appointment of Mrs. Daniel V. McIsaac as music commissioner expires today. While the commission may send notice of the approval of her appointment to the city clerk before night, this is considered as doubtful at city hall.

Alleged Hair-Snapper Held

Boston, June 10.—Seward C. Simmonds, a Harvard student, who is accused of cutting a lock of the hair of Lillian Santangelock, appeared before Judge Fallon, waived examination, and was held in \$300 bonds for the grand jury.

Set on Fire by Pipe

Buxton, N. H., June 10.—Falling to the ground when struck by a paralytic shock in the yard of his home in Brentwood, D. F. Fellows, 70 years old, was burned to death when a spark from his pipe ignited his clothes.

Wendling Accused of Murder

Louisville, June 10.—Alma Kellner met her death at the hands of Joseph Wendling, missing janitor of St. Joseph's Catholic church, according to a verdict returned by a coroner's jury.

"HOLY GHOST" SHIP MOVING

Sandford's Kingdom Drops Anchor in Boston Harbor

SET SAIL FROM PORTLAND

May Have Left Maine Port to Escape Process Served Following Alleged Exposure of Conditions in Colony at Shiloh—Captain Says That Fifty Persons Are Aboard

Boston, June 10.—The "Holy Ghost" and "Us" vessel, the barkentine Kingdom, owned by "Prophet" Frank W. Sandford of Shiloh, Me., slipped quietly into Boston harbor and anchored abreast of Governor's island.

From the inconspicuous manner in which the Kingdom came into the harbor and went to her anchorage, with no one seen aboard except a few sailors, the impression spread along the waterfront that the vessel fled here from Maine to avoid habeas corpus writs for "Elijah" Sandford and other people aboard of her, such as figured in the sensational Whittaker case.

The Kingdom was last in Portland harbor. There Mrs. F. A. Whittaker and her four children escaped from the vessel and from the Sandford influence. It was reported in Portland that the authorities were seeking others among Sandford's flock.

The Kingdom came up from the lower harbor without a tug. Having gone as far up the inner harbor as she could safely under her own sail, she anchored. No boat was put out from her. No gangway was lowered. It is thought that an effort will be made to file a writ of attachment upon the Kingdom, which is the property of Sandford.

Mrs. Florence Whittaker, in her action to recover damages in the sum of \$100,000 from Sandford, will move at once to attach what property of Sandford's she can that in the event of a judgment favorable to her she may have something tangible upon which to levy for payment.

It may be necessary to bring a new action under the laws and in the courts of Massachusetts in order to obtain a writ of attachment which can be served upon Sandford in Boston harbor.

Sandford has been apprised of this, and it is thought will keep moving into waters of other states, thus avoiding the service of any papers which might force him to appear in court.

Captain Perry of the Kingdom told reporters that there were twenty women, twenty-five men and five children aboard the vessel. They say they do not know where they will go from here or why they are here. Perry would let no one board the vessel, and said that Sandford was not aboard.

Mrs. Whittaker Liberated Auburn, Me., June 10.—Mrs. Florence A. Whittaker, the "Holy Ghost" and "Us" disciple, who was taken off the Sandford yacht Kingdom at Portland Monday by a deputy sheriff on a writ of habeas corpus, was ordered discharged from the restraint placed upon her by her husband, Rev. A. A. Whittaker, and the care and custody of their minor children was given to her by Judge Savage.

Mrs. Whittaker was the only witness. She told of being induced to board the Kingdom mat Jaffa by promises of Rev. F. W. Sandford, though she had money which was sent her by relatives to pay her fare home by steamer. Since her arrival in Portland thirty-one days ago she was kept a prisoner on the Kingdom and Sandford flatly refused to keep his promise to let her go, but said she must do as her husband wished.

FOR FEAR OF FEUD

Immigration Officials Cause Newly Arrived Italian to Be Deported

Boston, June 10.—When the White Star liner Cunipio left here this noon for the Mediterranean she had on board Stefano Rappo, who arrived on the same steamer last Monday.

According to the port officials, Rappo is alleged to have killed a man in Avehino, Italy, his native town, and as the four sons of the murdered man live here, it was feared that Rappo's presence here would renew the old feud.

Rappo claims he was incarcerated in prison for twenty months, awaiting trial, which resulted in his acquittal. As he had no proof of this he was detained.

Army Officers in Aero Flight

Paris, June 10.—Two army officers flew in an aeroplane from Châlons to Vincennes, a distance of 105 miles, in two hours and fifty minutes. They made the trip with the chief purpose of investigating the military capabilities of the aeroplane.

The Weather

Albany, Saturday, June 11. Sun rises—4:27; sets—7:27. Moon sets—11:37 p. m. High water—1 a. m.; 1:30 p. m. Forecast for New England: Unsettled; light to moderate variable winds, mostly east and southeast.

IS REFUSED ADMITTANCE

New York Congressman Embarrassed on Visit to White House

Washington, June 10.—Representative Harrison of New York was refused an audience at the White House when he called with a number of Jewish delegates who had appeared a short time before at a hearing by a house committee on Harrison's resolution to have congress protest against the Russian massacres. After some parleying, however, the Jewish delegates accompanying Harrison were admitted to see Mr. Taft, although the New York representative himself waited outside.

Mr. Taft based his refusal to see Harrison on statements attributed by newspapers to the representative concerning his resolution in the house calling upon Attorney General Wickham for full information as to the connection of his office with the Bellingham-Pinchot episode.

Mr. Harrison, according to the White House version of the matter, charged the president and Wickham with having wilfully misled congress in the back dating of the attorney general's summary of the Glavis charges against Bellingham.

TO HEAR ALL SIDES

Roosevelt Invites a Kansas Insurgent to Confer With Him

Washington, June 10.—That Theodore Roosevelt intends to hear both sides before reaching any decision as to the attitude he will assume with regard to the administration and the insurgent situation was further evidenced when it became known that Representative Madison of Kansas, an insurgent, has received a letter from the former president in which Madison is invited to a conference in New York immediately after Roosevelt's return.

The invitation to Madison has inspired fresh hope in the insurgent ones that the former executive will line up with them after his careful review of the situation. Roosevelt already has agreed to speak in Kansas, the state from which Madison hails, upon the invitation of Governor Stubbs.

When the house got word of the Roosevelt-Madison letter it increased speculation as to Roosevelt's probable course and caused some uneasiness among the regulars.

FOSTER MOTHER HAS "KIDNAPPED" CHILD

Girl Gone Three Days Is Returned to Home in Boston

Boston, June 10.—After all the police in New England had been on a three-day search for 3-year-old Irene Dowling, she was returned to her foster mother, Mrs. Jane McDevitt, by George Lovell and his wife.

"Little Irene was taken to Salem, according to the story of Mrs. Lovell, who called here and gave her to me," said Mrs. McDevitt.

Mrs. McDevitt would not say what would now be done about the kidnapping charge. She appeared satisfied with the return of the little girl, whom she legally adopted.

Up to last Sunday night the Lovells had the child and when Mrs. McDevitt demanded the child they fled. Mrs. McDevitt notified the police and every town and city in New England was told to be on guard.

SENT MONEY TO COLEMAN

Witness Says That Cash Was Furnished "Marshall" by Kellner

Boston, June 10.—John R. Marshall, the mysterious "real estate dealer," telegraphed \$200 to George W. Coleman when the fleeing bank clerk was in Kansas City, according to the sworn testimony of John A. Cuniff in the trial of "Big Bill" Kellner.

The cash was furnished by Kellner, however, Cuniff testified. Cuniff said he saw Kellner hand the money to Marshall on Feb. 21, and that he accompanied Marshall to the Western Union telegraph office and saw him pay the money to a woman cashier.

This is in flat contradiction of the testimony of Miss Kilday, employed by the telegraph company, who swore positively on the witness stand that Kellner had sent the money in person.

STORK NEGLECTS FRANCE

Far Outstripped by Germany in the Matter of Population

Paris, June 10.—Vital statistics show a decrease in the birth rate in France. The births during 1909 were 770,000, against 792,000 in the preceding year.

Since 1861 the population of the republic has been increased by 3,000,000 only, while the population of Germany in the same period has been increased by 30,000,000.

Cabrera's Son Tries Suicide Ocherbourg, June 10.—A young son of President Estrada Cabrera of Guatemala attempted suicide here. He is consumptive.

Progress on Harbor Bill

Washington, June 10.—The conference report on the river and harbor bill was adopted in the senate by a vote of 45 to 13.

FRIDAY, JUNE 10, 1910.

OBEY THE LAW

The Maine Central and Boston and Maine railroads are running a good farming train under the management of the University of Maine and that train is to spend the time from 8.33 to 10.00 a. m. at Eliot depot.

New Hampshire has had a similar good farming train in the past, but is this year unable to do so on account of the antifree pass law, by which it becomes illegal for the railroad to carry the agricultural experts unless they pay full passenger fares.

The good farming train does not represent railroad charity, for it is one of the methods for stimulating business on the line of the railroad, business from which the railroad will get increases of both freight and passenger traffic.

Some parties in this state have openly advocated that the railroad and the state college dodge this law, by the railroad presenting the college money enough to cover these passenger fares, the railroad having a right, perhaps, to donate money to such an institution, and that the college should then expend that money for the necessary passenger fares.

This is advocated by some of the very men who have been shouting about evasions of law.

Better let the good farming train go for a year or two. The dodging of law is one of the evils of this day and generation, the same as it has since there first were laws to be evaded. It is a decided evil and one that should not be countenanced for the sake of some temporary good.

Gentlemen, obey the law.

BIRDSEYE VIEWS

A timely reminder of the successful working way of honest politicians of the old school was given by congressman Hamilton of Michigan the other day as a saying of Hannibal Hamlin of Maine the first running mate of Abraham Lincoln in a presidential election campaign and one of the worthiest of our vice presidents. Mr. Hamlin was asked why his leadership was so uniformly acceptable and replied: "Well, I look over my shoulder every once in a while to see how they want to be led."

President Nichols of Dartmouth takes this sensible position: "At Dartmouth, we view the question from a totally different viewpoint than that taken by the Carnegie foundation. I am a believer in the smaller schools, where more intense teaching is possible than in the larger schools. If we may judge physicians in the same way we do business affairs—by results—then it seems to me Dartmouth medical school is successful, in that its graduates are able to secure the best hospital appointments that are tried for in open competition with the students of the larger schools."

AMONG OUR EXCHANGES

Indian Trails for Airships

Orville Wright recommends for both the St. Louis and Chicago airplane flights the line of the Hudson and the Erie Canal to Buffalo, hence the lake shore to Cleveland, where the St. Louis route would diverge to the southwest.

This is, as far as Cleveland, precisely the route the unlettered civil engineers of the Iroquois Indians laid

out before white men came to the country, except that the Indians at times varied it by taking Wood's Creek to Oswego. Living on the Mohawk trail, they easily ruled the tribes far and near in either direction.

They made paths for more than they know, those Six Nation pioneers. After them tramped the royalist armies; the wagon road followed their footsteps, then the canal, the telegraph, six parallel railway tracks—and finally the airship will ply their route to regions they once reached so slowly by paddle and portage.

Mr. Wright does not consider it wise at present for an aeroplane to cross the Alleghenies, since height reduces motor efficiency and emergency landings are few. Ultimately the aeroplane must take this route also; and when it does it will not fly straight over the bristling mountain tops like a balloon, but will follow the lower level of the old Lenni-Lenape trail along the Susquehanna and the Kiskiminnolas to the scene of the Braddock massacre.

The Indians could hardly have guessed that they were surveying airship routes when they made their trails, but they were.—New York World.

The Life Savers

Because of the personal devotion which the late Congressman Lovering gave to the interests of the men of the life saving service, his death was a serious loss to them. There are bills now in congress to provide for a retired list and for a graduated scale of compensation based on length of service. There have been bills in plenty, proposing the same desired and deserved objects, in every congress for at least twenty years. From no quarter has there arisen any objection to such measures, calculated as they are to make the service more remunerative, encourage a high grade of enlistments and the retention of the most fit. Nobody questions that the service should be so endowed and administered as to make it appeal to desirable young men for a career; as is the case with the army, the navy, and the revenue cutter service. Why an improving measure has not passed long ago is explainable only on the general presumption that the service is unable to avail itself of that organized propulsive force which congress usually seems to require when action is needed on a matter even of real merit.—Providence Journal.

Strawberries, Smothered and Plain.

This is the season when expert and amateur hand out fifty-seven varieties of the "best way to eat strawberries." The average lover of the fruit in this country has fellow feeling with the Irish swain who to give the highest praise to his sweetheart's tips compared them to "a dish of ripe strawberries smothered in cream." But ripe strawberries look delicious and tempting in all ways, even sugar imitations on candy counters and the still more fraudulent imitations put on canvases by the clever brush.

People who don't know the delights of strawberries in cream are all but universally pitted, and yet half of the gourmands in the strawberry belt, taking the world over, prefer theirs any way but that. A generous sprinkling of black pepper makes them palatable to a limited number. In some civilized countries they are floated in wine. Spanish cooks sprinkle them with orange juice, and hungry school children who forage the fields for wild fruit ask nothing to make them palatable beyond a crushing between two slices of buttered bread. And if all the cream and wine and orange juice were cut out all the strawberries that grow would still be eaten and richly enjoyed.

Statement is made that the return from Uncle Sam's new tax on corporations will be \$22,000,000 instead of the estimated \$30,000,000, which is just \$22,000,000 more than the corporations ever contributed to the government before.

Drain the little pools and pockets of water or coat them with oil to keep down the mosquito crop. Fish will do the business even better where the water is deep enough for them to have full swing.

The demand for a safe and sane Fourth is spreading generally, but there are a few cities content at the mere prospect of one less crazy and deadly than usual.

At the last King Edward had but a few words to speak, and they referred to duty performed, beyond which it was needless to say more.

Thunder and lightning, rain, cool sunshine and frost, weather marks of four seasons, all in the month of May.

Maybe high prices are coming down solely to dodge a short lived comet.

If the census didn't find you, find yourself and let the census know.

Mrs. Smith Hollins McKim, Society Woman, Seeking Divorce at Reno

The most famous member of the Reno (Nev.) divorce colony now is Mrs. Smith Hollins McKim of Newport, New York city and Baltimore. She is seeking a divorce, which is due to be granted within the next month. Mrs. McKim has one of the finest apartments in the Plaza hotel, New York city; a villa at Newport, an ocean going yacht, an estate of 7,000 acres in South Carolina, besides a beautiful home in Baltimore. She has given up all these luxuries for the time being to live in a little hotel in Reno that she may secure a divorce. Mrs. McKim was in a fair way for a time to become the leader of New York's Four Hundred, but this honor she has also laid aside until after her decree is granted.

PORTSMOUTH'S ABSENT SONS AND DAUGHTERS

Send in Their Names on the Blank Printed in This Paper

The committee on the return of the Sons and Daughters are anxious that names of former Portsmouth people who are now residing in all parts of the country should be handed in as early as possible, and it is the intention of the committee that no native or former resident be overlooked.

The Herald, every day of late, has been handed several names by the people who are interested.

To help the committee on invitations and the public, this paper will print the following blank daily, which can be filled out and returned to this office, and we will see that it gets into the hands of the committee.

Return of Sons and Daughters

Name _____

City or town _____

State _____

Please fill out and return by mail or otherwise to the office of the Portsmouth Herald.

PEOPLE'S OPINIONS

It Was Something Worth While

Editor Herald: It was a pleasure for those who attended the theatre last evening to see so many of the favorites back on Music Hall stage. Among those who won so much popular favor here last March and again appeared last evening were Miss Gertrude Huntington, who assumed the character of "Aunt Abby," Miss Ethel Nelson, the charming little soubrette who sang and danced with a vigor that was refreshing, and who has been on the stage since she was a mere child. She is a veritable wonder in her line of work.

Miss Estelle Tearle scored a decided hit with her songs. She was greeted with great applause when she gave the "Country Maid" in the first act, also in the "Wading Song" and dance in the second. She proved to be an artist of much ability. Miss Frances Steele, who took the part of "Jug" in the country" did her work exceptionally well, especially as this is her first season on the stage. She has been a member of "Billy, the Boy Artist" company during the season, which opened in this city last March. The Gibson girl is always an attrac-

tion and she was no exception last evening.

Portsmouth, June 10.

CARD OF THANKS

A public vote of thanks is gratefully tendered by Storer Relief Corps to all who so kindly assisted us in our Memorial service to our soldiers-sailors dead on Memorial morning.

To Rev. Mr. Farmer, who so kindly offered prayer, to Supt. of Schools, Mr. McDougall, to Prof. Whittier, to Maj. Chauncey B. Hoyt, to teachers, scholars, and surely we would not forget the parents in their kindly duties and we would also return thanks for the courtesy extended to us by Manager Pattee of Hotel Rockingham, through Chief Marshall J. Albert Sanborn on Memorial afternoon. All kindnesses and courtesies will ever be fondly cherished by every member of our order.

By command of the president, MABEL L. SMITH.

WHITE MOUNTAIN FOREST RESERVE

An Opportunity to Work for the Bill's Passage

An appeal received from the Boston Chamber of Commerce asks for help in securing the passage at this session of the Weeks bill for White Mountain and Appalachian forest reserves. The bill is lost this year unless the committee on rules will report a special rule to enable the calling up of the bill. The members of the committee are John Dalzell, Walter J. Smith, H. S. Boutell, J. Sloat Fassett, Sylvester C. Smith, Champ Clark, O. W. Underwood, Lincoln Dixon, J. J. Fitzgerald, George P. Lawrence.

It is urged that business associations and people generally throughout New-England telegraph or write to members of this committee urging such action.

This paper has many times pleaded for the passage of this act. Now there is an opportunity for action. Let Portsmouth board of trade and the business men in this vicinity on both sides of the river urge it on this committee and on the New Hampshire and Maine congressmen.

It will help boom both New Hampshire and Maine. Let us do what we can.

ENTERTAINED AT EXETER

Portsmouth Talent Pleased People in the Academy Town

Portsmouth talent was represented Wednesday evening at an entertainment given in Exeter. Among those from this city were noted Miss Harriet Bilbruck, who gave some finely rendered piano selections; Miss Ma Belle McCallin, whose recitation in costume was especially pleasing; Ethel and Jennie Lynn, who proved very popular in their costume recitations, and musical selections as well; and Portsmouth's favorite little soloist, Miss Ella Goodwin, whose future success as a singer is already assured. Misses Grace and Ella Goodwin also sang "There's Always a Mother Waiting in the Home, Sweet Home," the words, as well as the music being most beautiful.

ADVICE TO MOTHERS.—Mrs. Whelan's Sore Throat Remedy should always be used for children's coughs. It soothes the child, soothes the throat, allays all pain, cures wind-cold, and is the best remedy for diarrhoea. Twenty-five cents a bottle.

Hammocks, good weave, fast colors, from \$1.25 up, at Paul's, 45 Market street.

ONE MOMENT PLEASE!

Electric Sign advertising is no longer an experiment. The most successful firms of world-wide reputation as well as the stores with whom we have done business give us facts that prove the advertising worth of Electric Signs to be far in excess of any method of advertising that has ever been devised for the amount expended.

Look for the most enterprising city of today and you will find one that uses Electric Signs on all available locations and where merchants appreciate the advertising value and use light. I am making and selling the best signs that can be produced, not the cheapest, but signs that will stand up and give service for years. Recent inventions have reduced the cost and also the cost of maintaining. Public spirit and civic pride demand well lighted business sections in our cities, why not do your part with a well lighted, artistic Electric Sign and increase your business as well.

I charge nothing for estimates or sketches and am always willing to explain details and serve your interests. Respectfully yours,

L. R. PAIGE,

UNION WHARF Portsmouth

YORK AND VICINITY

York, Me., June 10.—The funeral of Asa L. Moulton was held today at the Christian church, Rev. Mr. Goss officiating. Mr. Moulton died on Wednesday at his home at York Corridor. He was aged seventy-three years and was married, his wife's name having been Malin. By this union there were four children, Walter C., a blacksmith; Wm. D., a carpenter; Frank A., carpenter in Kittery; and Dora M. Moulton. Asa L. Moulton was a life long resident of York, being the son of David Moulton. Although never prominent in public affairs, he was interested in the well fare of his town. He was a member of the Golden Cross society.

Beginning July 1, the York Village postoffice will become a third class office, instead of fourth class as heretofore. Besides the advancement in class the office will also pay a regular salary of \$1300 to the postmaster, James L. Holland.

HIS ACCOMPLICE.

The Obliging Old Lady Who Helped the Struggling Boy.

When a kind old lady in walking along a north side residence street beheld a small boy struggling valiantly to reach something between the gratings of a tall iron fence surrounding a paternal residence she paused to watch his operations. The object of his quest she discovered to be a handsome mechanical toy, an automobile that would run when wound up. The boy had a stick with which he was trying to pull the machine toward him, but as he could scarcely reach it the struggle was well nigh hopeless.

"Let me try it," said the old lady. "My arm is longer than yours."

"All right," replied the youngster, relinquishing the stick.

Getting down on her knees, the old lady, by dint of much stretching and careful manipulation, gradually worked the machine toward the fence and at last had the satisfaction of seeing the little boy grasp it with eager fingers.

"Now," she said, "you must be more careful and not let it get away from you again."

"Gee," said the boy, "it never got away from me, an' it ain't gold' to neither."

"Wh-wh-why?" faltered the old lady, with the dawning of a horrible suspicion, "isn't it yours?"

"You bet it's mine now," said the kid, and away he scampered, leaving the good old lady alone with her conscience.—Atlantic Constitution.

THE WORLD TONGUE.

Hardly a Land in Which English is Not Now Heard.

The traveler of today, unless he is going to Tibet or Tierra del Fuego, can get along very well with a knowledge of the English language. The farther he goes, the more he is surprised at finding that English is really "the" world tongue. In France and Spain and Italy the American traveler is cruelly "spotted." He is approached on the streets by those who would for a consideration make him feel quite at home. One of his chief worries is to escape the pests who can speak English and who wish to "apprise him of the fact. They may not necessarily desire to molest him. Sometimes they are seeking merely to "show off." At any rate, they classify distinctly as bores. One may go to Smyrna or Constantinople or Beirut and still find the streets plethorically full of English speaking nuisances. At Jerusalem he will be fairly flooded with English. He may penetrate even to Damascus, and he will find at least a befezzed hall porter who can converse glibly with him and any number of quently willing dragomans. He may go to Cairo, and in the shadow of the pyramids he will find blue gowned Bedouins speaking more than passable English. He may go hundreds of miles up the Nile and may be steered through the locks of the first canal by frizzily haired Nubian boatmen who make insistent demands for backsheesh in very intelligible terms. He may wander donkey back to the tombs of the kings in the Sahara desert and be painfully disabused by a few words of concise information or explanation by some barefooted, dusky tent dweller.—Cleveland Plain Dealer.

METEORIC DUST.

Bombards the Earth in an Invisible, Never Ending Shower.

Meteoric dust particles are infinitely finer than grains of sand. They have an interesting origin. Meteors or shooting stars have been bombarding the world from the beginning at a rate estimated at many thousands an hour, of which, however, an average of only five or six are visible to the naked eye in that time.

Owing to our protecting envelope of air few of these missiles reach us. In weight meteors vary from a few ounces to many pounds. Occasionally one is of sufficient dimensions to survive the passage of eighty to a hundred miles through an atmosphere increasing in density as the earth is approached.

The speed at which they enter the atmosphere, calculated at not less than thirty-five miles a second, generates such intense heat by friction that the iron, of which the meteor principally consists, is immediately reduced to an incandescent vapor, which is the luminous train so frequently seen in the heavens on a clear night. The vapor rapidly cools and condenses in the form of these minute particles, which assume the spherical form, as does shot during its fall from the top of the tower.

Finally the little spheres are scattered by the winds and currents in the upper air and gradually descend in their millions as an invisible, never ending shower. The perfect condition in which these meteors are found is due to the presence of certain non-corrosive elements found by analysis to be present in the metal of meteors which have come to earth.—Chicago Tribune.

Turning the Tables.

He (after a quarrel, bitterly)—I was a fool when I married you. She—I knew it, but I thought you would improve.—Exchange.

People who fish for compliments do not need long lines. They will get their best bites in shallow water.

A FINE TRADE BOOSTER.

Turn a Smiling Face on Your Customers and Watch Results.

"In my opinion, about the greatest natural asset a man can have," said a retailer a few days ago, "is that of good nature. And I am speaking entirely from a business point of view too. Aside from the happiness that good nature brings to the individual himself, it has distinct business advantages that should not be lost sight of for an instant."

"In the first place, the good natured man has lots of friends, and the value of friends who may be made customers or who may be depended upon to give one the benefit of any good thing they may have is in itself a good thing. Then, too, the good natured man is one who is confident, optimistic and willing to take a bigger chance in the course of his daily work than the suspicious and ill tempered individual, and, since all business is taking a chance to a greater or less extent, this is another resource that should be taken into account."

"Now, it is easy enough to say be good natured, but perhaps for some of us it is not the easiest thing in the world to become. To get away from the grouchy habit, if we have it, is undoubtedly difficult, but it can be done, and all of us know of people who have overcome it. What I do want to say, and it applies to the merchant and his clerk with equal force, is that the result is worth the effort, not alone in making life more worth living, but in putting a larger cash balance on the right side of the account, and that is what all of us who are in business are striving to accomplish."—Boot and Shoe Recorder.

WINDOW DECORATING.

German Mercantile Associations Give the Storekeepers Lessons.

Deputy Consul General Simon W. Hannauer writes from Frankfurt that to cultivate the artistic taste of German storekeepers and their sales people the German Association For Mercantile Education, with the aid of the German Work League, has recently instituted instruction courses of six weeks' duration in the cities of Berlin, Leipzig, Halle, Hanoverstadt, Magdeburg and Brunswick. A number of other German cities will now also receive these instruction courses, which are directed by distinguished art critics, experts in trade, design and fashion.

Subjects of instruction have hitherto been the art of decorating dwellings, draperies and clothing, the manufacture of artistic small wares and the decorating of shop windows. There is no doubt that this system of educating manufacturers and sellers so as to attain high artistic taste and beauty of style in production will enhance German reputation and promote the sale of German productions to foreign countries.

GET THE STICKER HABIT.

This Form of Town Boosting Fast Growing in Favor.

Use of the advertising sticker as a means of boosting towns and cities is growing rapidly in popularity throughout not only the United States, but in foreign countries. Many communities in Europe are fast forming the habit, which is considered by many to be an excellent one. The sticker is affixed to all correspondence and packages leaving the town or city in which the boosting enthusiasm has taken hold. Any ambitious townsman can design one in any shape or form. Here is a sample sticker:

NEW LAKE

Gem of Inland Waters

Unexcelled Shipping Facilities

FREE FACTORY SITES

TOWN OF NOTOWN
N. Y.

BEAUTIFUL HEALTHFUL

Residential Locality

The Garden Spot of Northern New York

The latest sticker is that of the Esperanto advocates. The international Esperanto congress will be held in Washington in August, and these language enthusiasts are now using Esperanto stickers to exploit the meeting.

Playgrounds For Children.

Though but a few years have elapsed since the advent of public playgrounds, the movement has taken such a strong hold upon the affections of the people that we see them pop up all over the land. In Los Angeles so many communities are enthused on the subject that efforts are now being made to obtain recreation spots for our progeny in at least a dozen different sections of the city, not in Greater Los Angeles, but in the city proper, as the older residents understand the term. Time will see them to all great cities by hundreds or at least by scores.

Winning Success.

The advertising merchant is the one who does the business in these days of push and enterprise. There are more newspaper readers today than ever before in the history of the world. The newspaper places your business under the eyes of the buyer.—Commercial Journal.

GAS CO. MAKING IMPROVEMENTS

The Portsmouth Gas company is doing a large amount of improvement on its property this season.

When the work is done, gas will be accessible to the people living along a mile and one third of the city's streets, where they have previously been obliged to do without. The particular feature of the work requires the laying of 7,000 feet of additional gas mains. The laying of these mains is about three-fourths completed and when completed will carry heat and illumination that much farther about the city than ever before.

At the manufacturing plant the condensing and scrubbing apparatus has been rearranged and the establishment equipped with new condensers, rubbers and washers. It is now capable of making twice the amount of gas that the company is selling.

The business of the company is steadily developing and its plant, by these improvements and extensions has been put in excellent shape to take care of both the present business and future increase.

NEWINGTON GIRL IN CAST

Smith College Students To Give "The Winter's Tale."

Northampton, Mass., June 10.—Spurred on by the success of its predecessor, the class of 1899, the senior class at Smith college is again presenting Shakespeare's "The Winter's Tale." This is a play with a universal appeal on account of its beauty as poetry, and its strong contrasts, both of character and atmosphere. In studying it, the students have attempted to preserve the unity of the whole, while still noticing the fine variations and contrasts. All the discipline and training of the college course contribute to the success of the production but especially the work of the elocution department under Miss Ludella Peck. This department has given careful training in the faculty of expression so as to bring out and present to the audience the interpretation gained from the literary study. The serious element is well represented by the group composed of the cruel and suspicious king, Leontes (Miss Holliday), his appealing queen, Hermione (Miss Van Wageningen) and the somewhat subordinated but nevertheless important characters Polixenes (Miss Whitney), the "good Paulina" (Miss Swett) and Camillo (Miss Bartlett). Contrasted with these are the romantic characters Florizel (Miss A. Hoyt) and Perdita (Miss Rost), a pair of thoroughly charming lovers. The two essentially comic characters are the Clown (Miss Dauchy) and Autolycus (Miss Wilds) who afford amusing relief from scenes of tension. These are well supported by all the other characters.

One of the interesting parts, that of Manilius, is taken by Miss Florence Coleman of Newington, N. H. The entire performance is under the direction of Mr. Alfred Young of New York, through whom has been secured the counsel and assistance of Mr. Franklin Sargent, a recognized authority on the stage-craft of "The Winter's Tale."

The music is played by the college orchestra under the direction of Miss Holmes and the mandolin club under Miss Greenwood.

The first presentation was last evening, and was a decided success, of which the students and all assisting may well feel proud.

NAPOLITANO—MURCH

Antonio Napolitano, barber of Portland, and Miss Lucy Murch, both of Portland, Me., were married at City hall on Thursday by City Clerk Lamont Hilton.

Silas Peirce & Co. Ltd. Wholesale Distributors

WHY experiment with ginger ales which are made of red pepper—and often of saccharine, brown sugar, molasses, coal tar coloring matter, acid flavors and hydrant water—when you can get a pure ginger ale made from fresh ginger, "Confectioner's A" sugar and pure flavor—

Clicquot Club

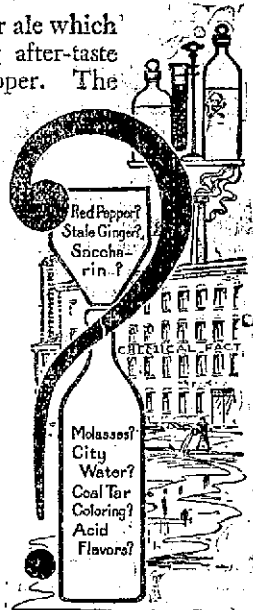

(Pronounced Kleeck-o Club)

Ginger Ale

"Clicquot Club" is the one ginger ale which does not have that biting, burning after-taste caused by the abundance of red pepper. The pure, fresh ginger used in Clicquot Club gives it a delicious, gratifying taste, pleasing to every one; the fine quality Confectioner's sugar gives it body and food value; and the pure citric fruit flavors add zest. There's no ginger ale so good as Clicquot Club, or so delicious.

OTHER CLICQUOT BEVERAGES with the "Clicquot" flavor and purity:

BIG SUMS OF MONEY FOR FLIGHTS

Nearly \$300,000 Offered for Various Stunts by the Bird Men.

New York, June 10.—The United States today lends the world in the number and size of prizes offered to aviators. Within the last ten days, \$287,000 has been hung up, besides to trophies. Prominent aviators today declared that as the result of these great offers, an invasion of foreign bird-men is looked for.

This total does not include the \$10,000 recently won by Glenn H. Curtiss in his 150-mile flight down the Hudson Valley nor has mention been made of the remuneration to be received by Charles K. Hamilton for his flight next Saturday from New York to Philadelphia and return, arranged by the New York Times and the Philadelphia Public Ledger. The list of prizes follows:

Flight	Amount
New York to St. Louis	\$30,000
New York to Chicago	25,000
Triangular race, Indianapolis to St. Louis, to Chicago, to Indianapolis	40,000
Seashore meet July 3 to 10	35,000
Washington to New York	20,000
St. Louis to Kansas City	10,000
Indianapolis to Chicago	5,000
Tokyo to Kansas City	2,000
New York to Scranton, Pa.	5,000

For aviators in long distance flights as inducement to fly over or stop at various cities, approximately \$100,000. For producer of the first aeroplane with two motors and two propellers, \$15,000.

Trophies to encourage the sport are offered by the Scientific American.

Hamilton Prepares to Fly.

C. K. Hamilton yesterday superintended the final preparations of his

machine, which has been overhauled for Saturday's Philadelphia flight. He also overlooked various sites in New York having concluded that Van Courtlandt, first selected, is too small for a starting place.

As a star purveyor of surprises, Hamilton seems in possession of inexhaustible receipts. He even surprised his mechanicians in a way they did not compliment.

"Get ready for a flight," he said to his men, "put on the old ailerons and the old propellers, boys. I feel like doing something."

Hamilton reversed the system followed by circus performers. They frequently appear intoxicated for the amusement of the audience just before the performance of some difficult aerial feat, such as jumping over the backs of elephants or dropping from the trapeze. Hamilton could not have flown for ten minutes as he did if he had not been acutely sober.

Like a Drunken Sailor.

His imitation of a drunken sailor of the air was firmness of the highest type. Except that he seems never to give the same kind of exhibition twice, those who saw him would hope that their friends might one day see him duplicate it.

He introduced the double dip, which does not mean anything on paper but makes women scream and the men use "swear words."

It can't be described, but just when the crowd feels sure that Hamilton will be hurt and is wondering what to do he flies almost straight up and does the whole thing over again, and although his face cannot be seen it is felt that he is grinning.

ROOSEVELT'S LAST DAY IN ENGLAND

London, June 10.—Yesterday was Roosevelt's last day in England, and it was a busy one despite the fact that no set program for his entertainment had been arranged.

The ex-President started before breakfast in an effort to catch up with his correspondence, dictating and writing for several hours all told. He also underwent a throat treatment.

He believes that the sea voyage will prove beneficial to his throat and plans to give that organ as thorough a rest as possible on the trip. Nevertheless every precaution is being taken to offset possible bad weather.

The announcement that Foreign Secretary Grey would accompany Mr. Roosevelt to Southampton to embark on the liner Kaiserin Augusta Victoria is taken as meaning that England regards the ex-President as on the plane of royalty. Such honor is customarily given only to royalty.

The police have completed arrangements to guard him on the trip from London to Southampton, the Scotland yard men who have been looking after him during his stay in England being reinforced for the occasion. The Southampton police have also taken precautions for handling any crowds.

All day friends of Mr. Roosevelt kept him busy saying farewell. He spent some time with Captain Arthur Lee, who has been his host, and several other close friends noted as big game hunters.

Many of his friends were among the 700 booked for passage on the Augusta Victoria. Mr. Roosevelt refused to comment on the resolutions adopted by a committee of the international arbitration and peace association, which declares his Gullhall speech to be a dangerous precedent in dealing with delicate political problems and protests against his advocacy of harsh methods in Egypt.

Mrs. Roosevelt spent the day in a sight-seeing trip to several points which she had not previously had opportunity to see and in meeting personal friends for the last time.

NAVAL MILITIA TO CRUISE

Washington, June 10.—The practice cruise for the naval reserves will occur this year during the week from July 23 to 30. By orders issued by Assistant Secretary of the Navy Winthrop the Massachusetts naval militia has been assigned to the battleship Vermont.

The Maine reserves have been assigned to the Louisiana, and will board the warship at Provincetown. The Rhode Island militia will go on the Mississippi and Idaho.

Rear Admiral Schroeder commanding the Atlantic fleet, will make arrangements for the cruise.

THEY NEVER FAIL

A Clever Ruse

But It Was Very Unexpectedly Thwarted.

By WILLARD DLAKEMAN
Copyright, 1910, by American Press Association.

On coming home from business I found my wife in the dumps. "What's the matter, dear?" I asked. "It's all up with us."

"Bottom dropped out of the universe?"

"Worse. Aunt Abigail will have to live with us. She's written that her friend with whom she has had a home is to give up her house the 1st of May, and that throws her out. I am her only relative, and of course she expects me to take her in."

"She's a bit cranky, isn't she?"

"Cranky is no name for it."

"Well, we'll have to make the best of it."

Aunt Abigail arrived. We had previously considered our home entirely our own. With the coming of our relative we saw at once that all this was changed. She settled herself down with an appearance of permanency that made my blood run cold.

"Well," she exclaimed, looking about her, "how did you ever come to build this house down in a hollow—it must have been a swamp once—when you could as well have put it up on that hill, where you could see something?"

"We live here winter and summer. Aunt Abigail. Up there we would freeze in cold weather."

"Freeze! Nonsense! Some people are always afraid they'll breathe a little fresh air. I'm not. I sleep with my window open, and I like to have a gale blowing in right on me. You should have fronted your house to the south."

"I can't stand this. We must get rid of her, I said to my wife."

"To turn her out would be awful."

"We needn't do that. We can fix it so that she will go of her own accord."

"For heaven's sake explain."

"You know the homeopathic principle—like cures like. Well, my Uncle Robert is more disagreeable. If that is possible, than your Aunt Abigail. He is a dictatorial old curmudgeon, with no respect for any one's opinion but his own. He is as poor as a church mouse, living in a miserable room in a rookery by himself. He amuses himself abusing his neighbors from his window and shying anything he can get his hands on at the cats. Now, it has occurred to me to bring him here as a foil for your aunt. She can't possibly endure to stay in the house with such a man, and when she's gone I'll find a way to get rid of Uncle Robert. Perhaps they may both go to get rid of each other."

"Your plan seems rather impracticable to me, Billy, but I have a good deal of confidence in those roundabout ways of yours. Suppose we try it?"

So I wrote Uncle Robert offering a home temporarily, and if he liked it, as long as he lived. He accepted eagerly, and it was not long before he was down upon us bag and baggage.

"My dear boy," he exclaimed, patting me on the back, "how you do remind me of your father! He and I were inseparable as boys, and I've carried you on my shoulder often, and to think that I'm to have a home with you! Put me anywhere. A garret is good enough for a broken down old coddler like me. Please! Somebody's been smoking here. Do you smoke? How I hate tobacco! It makes me sick."

"I won't smoke any more in the house since you've come, uncle," I said.

"Oh, don't mind me. I can stand anything, son to stand it. I've made a dead failure of life and don't deserve anything else. You don't mind my opening the window, do you—just to let the odor out?"

"Fanny has a bad cold, you know."

"Just the thing to cure her. Let her breathe the cool air of heaven."

Up went the window and out of the room went Fanny. Half an hour after my uncle arrived dinner was announced. I was watching our guests when they entered the dining room. It was like a dog and a cat at first catching sight of each other. Both seemed to crouch for an encounter. Neither spoke to the other for some time after taking seats at table. Then a remark of Uncle Robert's ruffled Aunt Abigail.

"This woman's voting craze"—he was beginning.

"Voting what, sir?"

"Craze, madam," raising his voice. "I'm not deaf. I heard you well enough. I object to you calling woman's suffrage a craze."

"Are you an advocate of woman's suffrage, madam?"

"I most assuredly am."

"I believe in any one who advocates a principle standing by that principle and not attempting to straddle!"

"Sir?"

"That is, to equivocate or knuckle down, defending the cause with all his or her strength. Per contra, I reserve the same privilege for myself. Woman's suffrage I consider the most abominable, diabolical, illogical rot that was ever sprung on a Christian people."

"And I consider it one of the holiest causes!"

"Aunt Abigail," interposed my wife, "do let me help you to this little bit of wing. You're not eating enough to feed a sparrow."

"I'm inclined to think," remarked Uncle Robert, "that there's a good deal in this new idea of diet. This man"

what's-his-name who is proving that the less we eat the more work we can do is going to create a revolution."

"Have you adopted his idea?" asked Aunt Abigail spitefully.

Considering that I had just filled Uncle Robert's plate for the second time this was unkind.

"I have not, madam, for the reason that I am not yet satisfied that his views are correct. I'm nothing if not scientific. I must see a thing proved before I adopt it."

"Would you prove woman's suffrage before adopting it?"

This was quite bright of Aunt Abigail.

"I admit," replied Uncle Robert, "that to prove it before adopting it would be impossible. It isn't necessary to prove it. Any fool can see that the idea is ridiculous."

"Uncle," I interrupted for the purpose of calling a truce and preventing Aunt Abigail from firing a return shot, "let me fill your glass."

"No, sir," putting his hand over it—"not at all, sir. I drink just one glass of wine with my dinner. And that's enough for any man."

"Quite right," I replied and filled my own for the third time.

"One is too much for any man, especially an old man," snapped the aunt. "Nothing is so disgusting to me as an old toper."

The shot, while it applied partly to me, was fired at Uncle Robert.

"Not at all," he replied. "One glass is good for the system. You know what St. Paul says, 'Take a little wine for the stomach's sake.'"

"Yes," retorted Aunt Abigail, "and I know that the devil can quote Scripture."

This was so well turned that I felt like patting the old lady on the back. But it did not appease Uncle Robert for the simple reason that he was unsquealable. The skirmishing went on, getting hotter and hotter, till at last, to prevent an open rupture, my wife arose from the table. She, poor woman, was dreading a fracas, and I was not anxious to have a break occur so early in the game.

As soon as Fanny and I were alone together we sat down and laughed.

"Did you ever see anything work more beautifully?" I said, snapping my leg.

"Never."

"Let them go their own gait. My opinion is that one or the other will get out within a week."

Every day my uncle came to me and said that he couldn't live in the same house with a cat and was going tomorrow. Every day Aunt Abigail went to Fanny and said she could not possibly endure that opinionated old heathen and she was casting about for another home, but it was dreadful that she should be alone in the world, with no one to love but Fanny, and Fanny must needs be lumbered by all her husband's relatives. I told my uncle that if I were deprived of the comfort of caring for my father's brother in his old age it would break my heart. Fanny made faint hearted attempts to quiet her aunt and agreed with her that my uncle was a trifle hard to get on with, regretting at the same time that he had the same claim on me that her aunt had on her. It is true that occasionally there would be a lull in the hostilities and we would find the two chatting quite amicably. But this was when they happened to strike some subject which was a pet with both. As soon as they drifted into topics on which they disagreed the roar of battle recommenced.

Several weeks passed in this way, and Fanny and I were getting impatient for the denouement. When one day uncle came to me and said that he would like to have a few words with me and Fanny alone. He looked very serious, and I felt quite sure he would announce his departure. He was a born gentleman, and nothing would be further from his nature than to hurt one's feelings, and to appear ungrateful would break his heart. I called Fanny into the library, shut the door and waited for the old man to speak.

"My dear boy," he began, taking my hand, "and my dear little girl," taking Fanny's hand, "I have something to announce which will surprise you. I am going to leave you."

"Oh, uncle," we both exclaimed, trying hard to appear much disappointed, even shocked.

"Yes, I am going away, and your aunt is also going."

This was indeed a surprise.

"Your kindness has brought about a great change in two lonely lives. For a time it seemed to both of us that we must thwart your plans for the happiness of both of us. It has not seemed that we can live under the same roof together."

He paused, and I thought he was going to shed tears. Then he added abruptly:

"We are both going to leave you tomorrow."

"Both?"

"Yes, both. We are to be quietly married at 9 o'clock and leave on a short wedding trip on the 10 o'clock train."

"Goodness gracious!" from Fanny. "Great Scott!" from me.

"But we shall be gone only a few days."

"And then!" exclaimed Fanny and I breathlessly.

"And then," resumed the old man, putting a hand on each of our heads, "we return to spend the rest of our lives with our dear niece and nephew. Heaven helps those who help themselves. At any rate, heaven came to our relief. I inherited \$20,000 from a maternal uncle. Of this I put \$5,000 in a house for the old couple and invested the rest in an annuity for them. Strangely enough, they are quite contented together."

EXETER, HAMPTON & AMES

Farm and Garden

FOR LOADING ANIMALS.

A Handy, Easily Made Contrivance Is Sometimes of Great Use.

Ferhaps every farmer has occasion to load some animal into a wagon, and many farmers prepare for this by building a stock chute. Frequently these chutes are built as permanent fixtures in connection with the feet

STOCK CHUTE.
 (From the Kansas Farmer.)

lots, but they are often made so that they can be transported from one part of the farm to another. When a chute of this kind is built heavy and strong enough to support the weight of a mature hog or a large calf it becomes a clumsy thing to move. R. J. Lincoln of Holton, Kan., has solved this problem of inconvenience in a very happy way, according to the Kansas Farmer. The wheels and axle used are parts of old machinery found on the farm, the wheels being taken from an old mower. The upper end of the chute is provided with two strong iron hooks, which are sharpened so as to engage the bottom of the wagon bed and prevent slipping after the animal starts upward. With such an arrangement there is no difficulty in building a chute of ample strength, because the question of weight has relatively little importance. The chute can be hooked on behind the wagon and hauled to any part of the farm, and it is comparatively easy matter to put it in position by hand.

Bees Notes.

One must be deliberate and not perspire when living bees. The bees do not like the smell of excited persons. Always have an empty box live about the apiary properly set on a floor board. This will often catch a swarm that might otherwise be lost. It is never good business policy to sell a customer bad honey or honey with an undesirable flavor. This will injure future sales. It is well to keep all vegetation down around the hives, so that it will not interfere with the flight of the working bees between their hive and the feeding ground. The number of colonies which any locality will support depends on the flora of the vicinity. There are but few places, however, that will not support from ten to twenty-five colonies to the square mile, and many localities will support a greater number than this. Bees fly long distances for nectar, averaging at least two miles. Smoke is the best agent known among beekeepers that can be used to make bees submit to their wishes. All sorts of material may be burned in a smoker, such as cotton rags, rotten wood, etc. There is a great difference in the disposition of bees, however, some requiring more smoking than others.—Farm and Ranch.

Growing Potatoes.

In Ireland, in the best potato growing localities, a yield of 400 bushels to the acre is nothing unusual. It is obtained by the use of about thirty loads of barnyard manure to the acre, supplemented by 500 pounds of commercial fertilizers, proportioned as follows: One hundred pounds of muriate of potash and 400 pounds of superphosphate. In England the best results are obtained by the use of twenty to twenty-five loads of barnyard manure to the acre, supplemented with 100 pounds of sulphate of ammonia, 350 pounds of superphosphate and 50 pounds of sulphate of potash. The popular fertilizer for growing potatoes in Maine, when planted where a two-year-old crop of clover or grass has been grown, is made up on the farm of 135 pounds of nitrate of soda, 600 pounds of tankage, 200 pounds of acid phosphate and 400 pounds of sulphate of potash, making in all 1,335 pounds. One-half this amount is used in the plow or mixed in the furrow and the other half at the first harrowing, when the plants begin to appear.

Insects and Alfalfa.

It has been discovered that the honey-bee is of even more importance to the alfalfa than the alfalfa is to the bee. The wonderful strength and speed of the bees take them long distances for their food, and they have recourse to a great variety of plants. But the peculiar construction of the alfalfa blossom renders it unable to fertilize itself, and its shape makes cross fertilization very difficult.

At the Kansas experiment station a small plot of vigorous alfalfa was covered just before coming into bloom with mosquito netting supported on sticks. It was therefore known that no bees or other insects could come into contact with the blossoms. Later a careful examination disclosed that the pods which had formed were entirely without seeds.—Coburn's "The Book of Alfalfa."

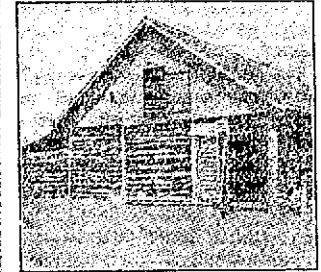

GO SLOW ON BROOM CORN.

High Price of Crop Tempting Many Farmers Into Untried Field.

The extremely high price of broom corn has aroused a widespread interest in the crop, says O. D. Center of the University of Illinois. Broom corn belongs to the same family as sorghum, Kaffir corn, milo maize and Jerusalem corn, all of which are classed botanically as *Andropogon sorghum*. It differs from the other members of this group in having the seed heads with much longer, straighter, stronger straws or branches. These form the brush, which is the valuable portion of the plant.

Broom corn growing now is and will always remain a small industry because the demand for the brush is not only limited, but small. This crop, then, is not a profitable one to include in a system of general farming. According to the best authorities, the world's consumption of brush is less than 50,000 tons, and as this brush is used but for one purpose there can be no sudden increase in the amount required. The total world's supply could be produced on 330,000 acres, and the territory and men equipped for and engaged in broom corn growing already could easily double the present production if the demand warranted.

Broom corn is marketed wholly in the bale. Throughout central Illinois there are numerous jobbers and commission men who do nothing but handle this crop. Because of dishonest practices in baling, large dealers and factory

A BROOM CORN DRYING HOUSE.

operators are cautious about buying except from established and reputable jobbers.

Because broom corn is selling for as high as \$200 per ton many novices who are attracted by the high prices will plant extensively this season. Without a working knowledge of the requirements of the crop and without the special equipment necessary for its successful handling the result of this extensive planting will be an enormous overproduction of brush, much of which will be of very inferior quality.

It is seldom the man who undertakes a new line of business because of abnormally high prices who makes the money. It is the man who thoroughly learns a business and then sticks to it through high prices and low who comes out with the dollar. This being true, we must say that this is not a favorable time to embark in the business of broom corn production.

Plowing Twice For Crop.

Sod land is very good for almost all crops if the season is seasonably wet and other conditions are favorable. One of the worst troubles with corn in sod land is that the cutworms living in the sod destroy much of the young corn. By plowing sod land for corn in late fall or early winter many of the cutworms will be destroyed; also when the land is plowed at this time the sod will have more time to settle and decay, and the corn next season will stand dry weather better. If the sod must be plowed again next spring no harm, but much good, will be done. Plowing any land twice for a crop or disking well after plowing is labor well spent.

Beautify the Home Grounds.

Properly planting the right kind of trees, shrubs and plants on the home grounds means much more than mere beauty—it has a decidedly practical side. It is cheaper to beautify the home grounds than to allow them to go bare and uninviting. Decorating the home grounds transforms a house into a home. It makes the house a part of a beautiful picture and surrounds it with such evidence of loving care that it immediately impresses the beholder with the feeling that people live in the house—that they do not merely exist there.—Journal of Agriculture.

BREVITIES.

Scandal is a very effective soil for crop.

Ten to one there is a surplus of lawyers, doctors and clerks in your country and a shortage of farm help.

The suggestion was made at a local English farmers' meeting that all moles should be killed at public expense. Next!

Well, sir, if people cannot get beef, pork or mutton at fair prices they will eat more eggs and chickens. Mrs. Hen is coming to the front.

The figures show that 182,000 persons attended the various farmers' institute meetings in New York last winter. Of course many of these attended several sessions.

In England the trade in worn-out or "sore" city horses has become so bad that parliament is asked for a law authorizing inspectors to kill all such animals that are found "doctored" or badly lame or diseased.—Rural New Yorker.

STATE'S FINANCES IN FINE CONDITION

The Concord Patriot publishes the following:

"The finances of the state of New Hampshire are in mighty good shape," said Judge W. B. Fellows, the state auditor in talking to a Patriot reporter at his office at the White House this afternoon, "and more fully when it becomes generally known that at the present time there is money enough in the treasury to pay all the current running expenses and meet all the appropriations that are due up to the close of the present fiscal year on August 31.

"Already the sum of \$266,103.93 has been paid on the work that is being done on the state house and the limited contracts covering the work that remains to be done fully ensure that this task will be completed well within the appropriation. In addition to paying the balance due on the state house there is enough money in the treasury to pay for the completion of the three trunk lines of highway that are being constructed through the state without issuing the \$20,000 or more of bonds that remain unissued to finance these projects. There will also be a substantial reduction in the

state debt announced with the returns from the state's financial transactions during the current year and the \$92,000 bookkeeping liability that has been carried against the state during the past 20 years on account of the provisions of the Benjamin Thompson will and the state college project at Durham will be completely cleared up.

"And I should like to have the people of New Hampshire know that to James E. French of Moultonboro more than to any other single individual belongs a great deal of the credit for the state's present sound financial condition, and I believe that there should be a large monument erected in his honor for he has surely done the state a service that would be hard to repay. In the enactment of the bills that limited all appropriations to some definite amount and also did away with all standing appropriations, Mr. French made himself a benefactor of the state.

"There are now no bills due and outstanding against the state; all expenses for three-quarters of the current year have been paid and there is now a cash balance in the treasury of \$559,893.25."

THE BEST MOTHERS IN THE WORLD

St. Louis, June 10.—"I deny that the high-strung, fine-grained young American mother is other than the finest specimen of mother in the world. I deny that we doctors or any others have the right to demand that, simply because she happens to have a baby, such a splendid creature should be treated as an animal. She should be treated with common sense and common humanity. The educated young American mother is not neglecting her nursing function or any other duty. She is, in the popular vernacular, 'on her job, all right!'"

Dr. Charles G. Kerley of New York, specialist in children's diseases, professor in the New York Polytechnic hospital attending physicians in the New York Baby's hospital and the

New York Nurses and Children's hospital, and general practitioner among New York's wealthiest folks, said this before the American medical association, in convention here.

The statement which aroused him was made by Dr. A. C. Cotton of Chicago, to the effect that the crude hygienic laws of savages for the protection of the primeval mother and her newborn child were more humane and scientific than modern social practices. He sent a note of warning directly antagonistic to the Roosevelt theory of race suicide, saying that race deterioration is due to over-rapid production. He said that a great price was demanded by civilization, in that it relegated the child to that class where the infant mortality is terrible, experience showing that out of 100 infant deaths

85 were of bottle fed babies. Dr. C. F. Wahrer of Fort Madison, Ia., had laid the facts of mortality through improper feeding of infants to what he termed "lazy, incompetent and socially bound mothers."

It was at this juncture that Dr. Kerley leaped to his feet and uttered a dramatic defence of the mother of leisure. "I am weary of listening to this tirade against American motherhood," said Dr. Kerley. "No woman in the world is more intelligently and conscientiously interested in her children than the educated young American mother, and no one is more willing to make sacrifices where sacrifices are necessary. But the fact that she is a mother does not necessitate her exclusion from all her normal former habits of life."

He believes it far better for a rich family to have one child carefully reared than for a poor family to have a dozen grow up in ignorance.

OLD HOME WEEK.

Return of the Sons and Daughters July 4, 1910.

The committee on invitations request that the names and addresses of all natives of this city now living abroad, as well as former residents, be sent immediately to the committee. Special invitations will be sent to every person whose address may be in the possession of the committee. CHARLES W. GRAY,

Chairman.

E. Percy Stoddard, Secretary. Lewis W. Brewster, William L. Conlon, Oliver L. Frisbee, Jackson M. Washburn, Fred E. Drew, Frederick M. Siso, Ralph W. Jenkins, Harry W. Pevnor, Horace Montgomery, Committee on Invitations. CH.H.

BILLY, THE BOY ARTIST

Plays a Return Engagement at Music Hall and Makes Big Hit.

Billy, the Boy Artist played a return engagement to this city on Thursday evening and there was a crowded house at Music Hall for the occasion. The company are about the same as first played with the show in this city, and of course the entire show goes along smoother than when first produced. There are many song hits and the audience was greatly pleased with the show.

Humor and Philosophy

By DUNCAN M. MITH

UNNATURAL.

MAN never was intended to sit all day at a scratch board, or to make a balance sheet. To be from noon till evening, chained to a desk and starved for light and sunlight in heavy, stagnant air.

Man never was created or formed with the design that he all day should labor down in a dismal mine with only lamps of smelting for artificial light.

Man never was intended to sit all day at a scratch board, or to make a balance sheet. To be from noon till evening, chained to a desk and starved for light and sunlight in heavy, stagnant air.

Shipsmith Appointment Still a Puzzle

Gunboats to Sail This Week From West Coast

Only a Few New Faces

Only a few changes have been made in the crew of the U. S. S. Eagle since the vessel left here last year.

Don't Seem to Be in Any Hurry

The matter of appointment quarterman shipsmith for which an examination was held on April 1, is still in the air as far as the yard is concerned. The five applicants who were after the position are growing a bit anxious.

Start for Portsmouth This Week

The gunboats Petrel and Wheeling coming to this yard from the west coast, are expected to leave the Mare Island yard this week for Central America.

Back from Sick List

John W. Bickford, coppermill's helper, and Forrest E. Moore, machinist, returned to duty after sick leaves.

Big Money for Racing

The racing crew of the U. S. S. Princeton, which is shortly to be relieved as police boat at Corinto have won \$21,000 in prize money by beating everything that came along in the way of a boat crew.

CHILDREN'S NIGHT AT THE GRANGE

Children's night drew a large gathering Thursday evening at the meeting of Strawberry Bank Grange, the hall being packed. The children gave a delightful entertainment with the following program:

Piano solo, Ruth Weaver.
Violin solo, Kendric Sanderson.
Vocal duet, Ethel and Jennie Lynn.
Drill by Sunbonnet Babies and Overalls Boys.

Piano solo, Martha Marden.
Recitation, Ethel Lynn.
Vocal solo, Eunice Jones.
Recitation, Jennie Lynn.
Violin solo, Kendric Sanderson.
Vocal solo, Ruth Marden.
Piano solo, Lucy Gorman.

The Sunbonnet Babies were Nellie Walker, Annette Bennett, Clara Bridie, Pauline Taylor, Florence Gray, Orintha Chick, Lena Smith and Lois Stott.

The Overalls Boys were Francis Walker, Philip Stark, Austin Barrett, George Bridie, Harold Bridie, Alfred Merrill, Howard Gray and Cecil Humphreys.

The program was arranged by the lecturer, Mrs. George P. Smallwood. The drill, which was such a successful feature, was learned by the children under the instruction of Miss Edith Paul.

Following entertainment Mrs. H. O. Hoyt and volunteer assistants served ice cream and cake to all the children and older folks, and the youngsters found life very pleasant with agreeable companions.

The event added another to the long list of successes at the meetings of Strawberry Bank Grange.

SCHOOL CHILDREN WILL MARCH

Superintendent J. A. MacDougall of the Portsmouth schools is arranging for the scholars to march in the procession at the return of the sons and daughters of Portsmouth on July 3.

They will make one of the finest possibly the finest of all the many features of the great parade.

Green string and wax beans, ripe tomatoes, spinach, lettuce and cukes at White and Hodgdon's.

LAID AT REST

Funeral Services of the Late John W. Sullivan Today

The funeral of John W. Sullivan was held today with services from the Church of the Immaculate Concep-

tion, where a number of sorrowing friends and acquaintances gathered to pay the last tribute of respect of the living to the dead. Rev. Dr. William J. White conducted the services and interment was in Calvary cemetery by Undertaker O. W. Ham. The pallbearers were Dennis J. Lynch, Daniel J. Murphy, William McCann, James Coughlin, William E. McEvoy and Daniel J. Falvey.

Lawn Swings, 2 people \$3.75; 4 people, \$5.00, Paul's, 45 Market street.

A Clover French Captive.

A person who was supposed to be the French General Montmout, comte de Lohau, was once captured by an English vessel, but after a time the captain discovered that his prisoner was the Count de Montmout. "Why did you deceive me?" he demanded angrily of the count. "I did not deceive you," replied Montmout: "not at all. You thought I was General Montmout. You told me so. You have a fifty gun frigate. Was it for me, who have only a pocket pistol, to contradict you?"

The captain did not forgive Montmout and took every opportunity to treat him rudely. One evening at dinner some one proposed the health of the French. As Montmout rose to acknowledge it the captain cried: "They are all cowards! I make no exceptions." When Montmout's turn came he gave this sentiment. "The English—they are all gentlemen, but I make exceptions."

He Cited the River.

Indignant Wife—You talk about having "mended all over the neighborhood" while you were waiting for your breakfast. You haven't been out of your bed! Husband (half awake)—Well, didn't you ever see a river mended without getting out of its bed?—Chicago Tribune.

Ice Chests \$6.75 at Paul's, 45 Market street.

ORDNANCE BUILDING

Is to be Erected at Fort Stark

An ordnance building is to be erected at Fort Stark in the Portsmouth Coast Artillery district.

Specifications and proposals for the same have been ordered by the war department through Capt. R. D. McBride commanding the district and bids will be accepted up to June 22.

The building is to be of brick, reinforced with steel and concrete. It will be one story high, eighty feet long and forty feet wide.

A BEAUTIFUL MONUMENT

A Fitting Memorial to the Late Rev. Henry Emerson Hovey

Fred C. Smalley, the local granite and marble dealer, corner State and Water streets, has recently erected in the cemetery at St. John's church a handsome monument to the memory of the Rev. H. E. Hovey, who was pastor of the church for twenty-six years.

The design is a Celtic cross of gray Westerly granite, ornamented with very artistic carved work. It stands twelve feet high, and is one of the most beautiful monuments ever erected in Portsmouth.

BILLY LEFT BEHIND

Three of Show Troupe Missed Train Today

Three of the company of Billy the Boy Artist, which played here Thursday night had a longer stay in Portsmouth than anticipated owing to missing the regular train which carried the rest of the troupe to Concord today. They killed the time the best they could and left to join the company on the noon train. Billy himself, was one of the trio who was left behind.

SATURDAY SALE

At Bass' Candy Department will be Jersey cream caramels, a regular forty cent value for twenty-nine cents, also the thirty-five cent chocolates for twenty-nine cents, as usual. Left
